Gaur.com

OVERVIEW

Gaur.com

Gaur.com is an AI-powered, gamified on-chain financial engine *dedicated to transforming the on-chain trading experience and pioneering a new era of intelligent finance. By integrating a comprehensive trading interface with a user-centric decentralized ecosystem and robust incentive mechanisms, Gaur.com aims to set a new standard for the future of decentralized finance.*

Opportunities

- *BNB Chain TVL grew by 58.2% YoY, with 4.7 million active users.*

- *Traditional DEX growth slowed by 15.7%, signaling demand for a better experience.*

- *DeFi sees 220 million monthly active addresses, accounting for 34% of all crypto addresses.*

On-chain finance is entering a critical phase of intelligent and gamified transformation.

What We're Building

- *AI Alpha Hunt Engine: Real-time scan of 300+ on-chain metrics to generate dynamic token health scores.*

- *Gamified Trading System: Each trade = points, achievements, NFTs - unlocking gamified USDT prize pools.*

- *On-chain ETFs and smart leveraged tokens: Auto-managed multi-asset portfolios with efficient, liquidation free leverage.*

Our Vision

- *Asset discovery - Beyond manual research - AI filters in real time Trading experience.*
- *Beyond basic buy-sell - gameplay-driven flow Financial products.*
- *Beyond single to*

PRODUCT INNOVATION

Traditional DEXs VS Gaur.com

Dimension	Traditional DEXs	Gaur.com
Asset discovery	❌ Manual research	✅ Real-time AI Hunting
Trading experience	❌ Only allow trading	✅ Gamified incentives
Product depth	❌ Single-token trades	✅ Structured portfolios
Project enablement	❌ Listing isn't the end	✅ Liquidity beyond launch

Asset Discovery

Traditional DEXs:
Users must manually sift through hundreds of tokens, rely on social media, and do extensive due diligence themselves. This often leads to missed opportunities or exposure to risky assets.

Gaur.com*:*
Our AI-powered "Real-time AI Hunting" engine scans the entire blockchain ecosystem 24/7 to identify trending tokens, early-stage gems, and abnormal trading signals—giving users a constant stream of actionable insights without the grind.

Trading Experience

Traditional DEXs:

Trading is a flat, transactional experience. You buy, sell, and hope. There's no engagement, feedback loop, or sense of progress.

Gaur.com:

We transform trading into an interactive game. Users earn points, unlock achievements, and participate in trading missions—making every transaction rewarding beyond profit. This "Gamified Incentives" system keeps users engaged and motivated.

Product Depth

Traditional DEXs:

Most offer only basic token-to-token swaps. No way to diversify, hedge, or manage exposure within one transaction.

Gaur.com:

With "Structured Portfolios", users can invest in themed baskets (e.g., AI tokens, Meme coins, DeFi leaders), dynamically rebalanced based on market trends and AI analysis. This introduces professional-grade strategies to everyday traders.

Project Enablement

Traditional DEXs:

Once a token is listed, support ends. Projects are left to fend for themselves, often leading to liquidity death and user attrition.

Gaur.com:

We offer "Liquidity Beyond Launch" — a suite of post-launch tools including liquidity farming, AI-driven exposure campaigns, performance dashboards, and community trading events. Projects get sustained support and visibility long after listing.

POINTS-BASED ECONOMIC SYSTEM

Earn Points

The growth of platform transaction volume drives the growth flywheel.

How to Earn Points?

- ***Trading****: Earn points for every transaction based on volume and frequency.*
- ***Referrals****: Invite friends and earn when they start trading.*

Points Usage

What Can You Do with Points?

- *Redeem Cash Rewards*

- *Swap Future $GAUR*

- *Claim Physical Entitlements*

- *.....*

Highlights

- **Dynamic Emissions**: Point output adjusts with platform activity and market conditions

- **Anti-Fraud Protection**: Smart detection to prevent abuse or bot farming

- **Level-Up Mechanics**: Higher points unlock account levels and exclusive benefits

ROADMAP

Roadmap

Q2 2025: AI Alpha Hunt Engine

- *Real-time on-chain data analysis and smart money activity tracking.*
- *AI-driven signal scoring and prioritization.*
- *Personalized signal notifications tailored to individual user preferences and trading styles.*
- *Transparent signal provenance ensuring data reliability.*

Q3 2025: Gamified Trading System

- *Points-based reward system where users earn points through trading activities.*
- *Mission and achievement systems designed to encourage sustained engagement.*
- *Points redemption store offering a variety of rewards and exclusive privileges.*

Q4 2025: On-chain ETFs and Smart Leveraged Tokens

- *Multi-asset index ETFs with automated portfolio rebalancing.*
- *Smart leveraged tokens featuring built-in risk control and stop-loss mechanisms.*
- *Transparent on-chain asset compositions and transaction histories.*
- *Support for user-customizable strategy portfolios and leverage configurations.*

ABOUT US

Core Team

Game.com 提供去中心化、合规且强大的创建代币服务，支持开发者轻松发行新资产。

Boz - Co-Founder - CEO ↗

A serial entrepreneur with extensive experience in blockchain startups. A product expert, Boz is highly sensitive to cutting-edge innovations in the Web3 space. He is dedicated to advancing Game.com's global strategy and platform development.

AI Algorithms

Former engineers from Google Brain and Cheetah Mobile.

Derivatives Design

Core team members from Deribit and BitMEX.

Game Design

Top-tier game economy designers.

Why Us

Why Us

Technical Moat

- *Leverages advanced **AI-driven signal system** for precise and efficient trade opportunity detection.*
- *Combines innovative **structured financial products** to enhance asset management and risk control.*

Product Differentiation

- *Transforms traditional trading into an engaging **gamified experience.***
- *Upgrades asset management into flexible, diversified **portfolio solutions** for smarter wealth allocation.*

Optimal Market Timing

- *Current on-chain trading experiences have clear gaps, creating strong demand for innovation.*
- *Rapid growth of the **BNB Chain ecosystem** provides powerful momentum for fast market expansion.*

Strong Execution Team

- *Cross-domain expertise spanning **AI, finance, gaming, and blockchain** ensures seamless collaboration.*
- *Deep industry experience guarantees efficient product design and execution.*

Market Trends & User Demand

- *Growth of traditional decentralized exchanges (DEXs) is slowing down, while demand for superior user experience is rising.*

- *Highly differentiated product model drives **self-sustaining user growth and engagement.***
